The screenshot shows a web form for ordering oligos, divided into four sections: Name and delivery, Oligo Sequence (5' to 3'), Scale/Purification, and Modifications & Fluorescence. The form contains four entries for different oligos. Numbered callouts (1-10) point to specific fields and actions:

- 1:** Oligo name field (Testprimer 1)
- 2:** Oligo sequence field (ACGTACGTACGTACGTACGT)
- 3:** Synthesis scale and purification dropdowns (0.05 µ mol, HPLC, Diss. in water)
- 4:** 5' modification dropdown (5' 6-FAM)
- 5:** 3' modification dropdown (3' TAMRA)
- 6:** Internal modification dropdown (Phosphorothioate) and position entry field (1, 2, 3, 18, 19, 20)
- 7:** Freeze dried checkbox (checked)
- 8:** Comments field (Quotation #CG103XX)
- 9:** Express delivery checkbox (checked)
- 10:** Order button

Below the form, a note states: "Oligos left blank will not be included in the order." There are "Order" and "Help" buttons at the bottom.

How to order oligos from CyberGene AB – second web order page of three

11. Refresh – After cancelling or altering you must refresh the order page to review your remaining order
12. Analyze – Check your primer for hairpins, palindroms, Tm, Ta and G/C ratio
13. Alter – Change any parameters of your oligo
14. Cancel – Delete oligo
15. Continue order – Add more oligos to your order
16. Checkout
